# FUQING GROUP 福庆集团

福庆集团创建于1990年,始终专注于木制品加工制造和家居服务领域,是国际规模领先的建材家居企业、国家级高新技术企业、中国胶合板协会执行会长单位。福庆集团整合优势资源参与全球竞争,依托互信共赢的优质经销商资源,以及强大的品牌化、标准化、系统化的服务体系全力发展建材和家居关联生态链业务,成为生态建材家居产业链集团。福庆集团凭借福庆优秀板材工艺基因,以技术致敬生活,引领中国家居生活环保主义新风尚。

Founded in 1990, Fuqing Group has always been focusing on wood products processing and manufacturing and home services, and is a leading domestic building materials and home furnishing enterprise, national high-tech enterprise, and the executive chairman of China Plywood Association. Fuqing Group integrates advantageous resources to participate in global competition, relying on mutual trust and win-win quality dealer resources, and a strong branded, standardized and systematic service system to develop building materials and home-related ecological chain business, and become an ecological building materials and home industry chain group. With the excellent plate technology, Fuqing Group pays tribute to life with technology and leads the new fashion of environmentalism in China's home life.

江苏福庆木业有限公司是福庆集团旗下子公司，福庆木业致力于“打造LVL建材国际第一品牌”，已形成面向国内与国际市场双循环的业务布局。依靠强大的品牌化、标准化、系统化的管理模式，依托互信共赢的优质经销商资源及拥有共同价值观的福庆团队，在业内已蓬勃发展了35年。

福庆木业品牌定位为“世界最大LVL制造服务商”，目前拥有占地30万平方米LVL建材生产基地、年产达35万立方的F☆☆☆☆级LVL胶合板生产线。通过优秀的资源整合能力，参与全球竞争，向打造LVL建材国际领军品牌道路上迈进。

Fuqing wood industry is a subsidiary of Fuqing Group. Fuqing Wood is committed to "Building the first international brand of LVL building materials", and has formed a double-circle business layout for the domestic and international markets. Relying on strong branding, standardized and systematic management mode, quality dealer resources with mutual trust and win-win situation, and a team with common values, Fuqing Wood has been flourishing in the industry for 35 years.

Positioned as the "World's Largest LVL Manufacturing Service Provider", Fuqing Wood currently owns a 300,000 square meters LVL building materials production base and an annual output of 350,000 cubic meters of F☆☆☆☆ grade LVL plywood production line. Through the excellent resource integration ability, the company participates in global competition and moves forward to build an international leading brand of LVL building materials.

## TESTING CENTER

## 检测中心

福庆木业检测中心依托福庆集团研究院成立，占地面积400平方米，拥有由12位行业专家学者组成的专家委员会，是“江苏省速生杨结构板材工程技术研究中心”、“高强度耐腐蚀功能性层积材工程研究中心”、“江苏省研究生工作站”，引入国际先进检测仪器，力求产品质量的持续提升，将产品品质的打造与追求作为企业的自律。

Fuqing Wood Testing Center was established based on the Fuqing Group Research Institute, covering an area of 400 square meters. It has an expert committee composed of 12 industry experts and scholars. It is the "Jiangsu Rapid Growth Poplar Structural Board Engineering Technology Research Center," "High Strength and Corrosion Resistant Functional Laminated Timber Engineering Research Center" and "Jiangsu Graduate Workstation," providing various testing services for Fuqing Wood Industry products for a long time. Real time monitoring of product quality.

Fuqing Wood Industry Testing Center has undergone a new upgrade, introducing advanced international testing instruments and striving for continuous improvement of product quality. The creation and pursuit of product quality are regarded as the self-discipline of the enterprise.

# TECHNOLOGICAL PROCESS

## 工艺流程

# NON-STRUCTURAL LVL

## 非结构型LVL

是一种由多层木单板用粘合剂顺向粘合而成的工程木制品。

It is a kind of engineering wood product made of multi-layer veneers in parallel bonded with adhesive.

杨木门芯材  
Poplar door core material

杨桉门芯材  
Poplar and eucalyptus door core material

### 产品尺寸 PRODUCT SIZE

等级	Grade	Non-Structural
树种	Tree Species	Poplar/Eucalyptus/Pine
尺寸	Dimension(mm)	Thickness Width Length
		10-70mm 12-1200mm 150-4000mm
含水率	Moisture Content	<12%
胶水	Glue	Urea-formaldehyde/phenolic adhesive
甲醛释放量	Formaldehyde Emission	E0
证书	Certificate	F☆☆☆☆ /CARB/EPA

### 材料优点 MATERIAL ADVANTAGES

#### 强度和耐用性 Strength and durability

非结构型 LVL 的设计坚固耐用，其实内芯由多层木单板组成。这使得它即使暴露在温度和湿度变化的情况下也不容易变形或破裂。

The design of Non-Structural LVL is sturdy and durable, and the inner core is actually composed of multiple layers of wood veneer. This makes it less prone to deformation or rupture even when exposed to changes in temperature and humidity.

#### 稳定性 Stability

由于其结构，非结构型 LVL 比实木更稳定，使其不易随着温度和湿度的变化而膨胀或收缩。这对于频繁使用或环境条件变化的家具尤其重要。

Due to its structure, Non-Structural LVL is more stable than solid wood, making it less prone to expansion or contraction with changes in temperature and humidity. This is particularly important for furniture that is frequently used or subject to changes in environmental conditions.

#### 成本效益 Cost-effectiveness

非结构型 LVL 通常比实木便宜，使其成为家具制造更具成本效益的选择。

Non-Structural LVL are usually cheaper than solid wood, making them a more cost-effective choice for furniture manufacturing.

#### 易于加工 Easy to process

非结构型 LVL 可以使用标准木工工具轻松切割和成型，使其成为各种技能水平的家具制造商的流行选择。

Non-Structural LVL can be easily cut and formed using standard woodworking tools, making them a popular choice for furniture manufacturers with various skill levels.

#### 多样性 Diversity

非结构型 LVL 有多种木材品种和饰面可供选择，因此可以轻松找到与任何设计美学相匹配的风格和颜色。

Non-Structural LVL come in a variety of wood varieties and finishes to choose from, making it easy to find styles and colors that match any design aesthetic.

### 材料应用 MATERIAL APPLICATION

适用于家具、门、层压板、厨房和其他室内装饰，以及其他用途。  
Suitable for furniture, doors, laminate, kitchen and other interior decoration, and other uses.

# STRUCTURAL LVL

## 结构型LVL

是一种由多层木单板用粘合剂顺向粘合而成的工程木制品。

It is an engineering wood product made by bonding multiple layers of wood veneer with adhesive.

树种	Tree Species	Radiata Pine/Larch/Spruce/Douglas fir/Eucalyptus
尺寸	Dimension(mm)	Thickness Width Length
		21-100mm 12-1250mm 2400-12000mm
含水率	Moisture Content	8%-15%
胶水	Glue	Phenol Formaldehyde
防虫处理	Treated	H2S
甲醛释放量	Formaldehyde Emission	E0
标准	Standard	AS/NZS 4357
证书	Certificate	Bsi/CMI/FSC/PEFC

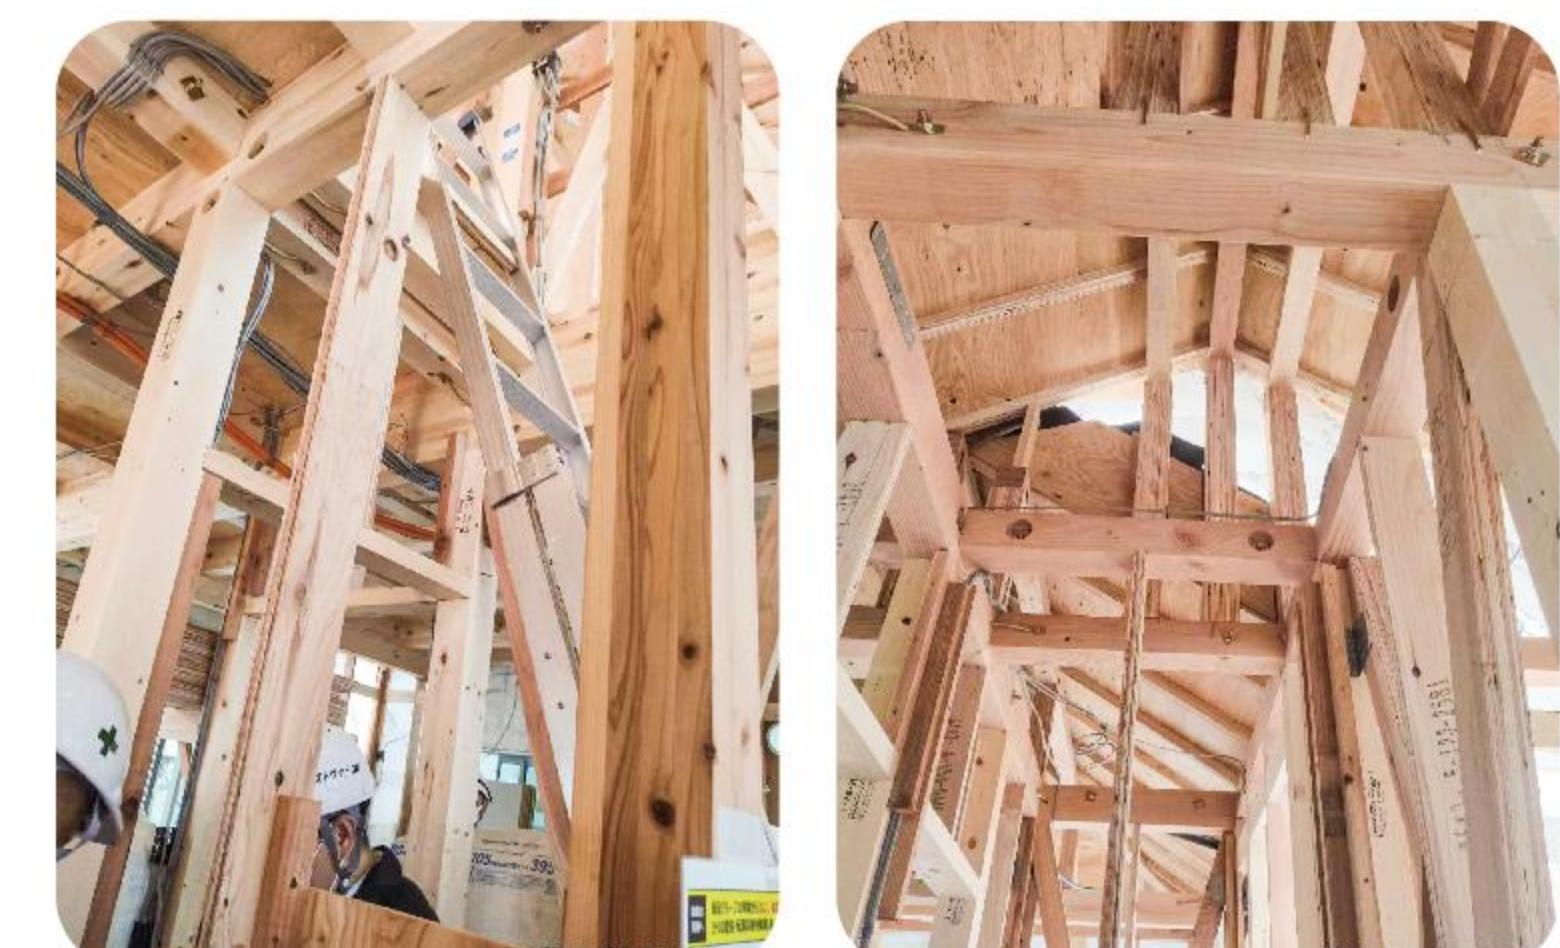

### 材料优点 MATERIAL ADVANTAGES

规格大 Large specifications	小原木可制成，通过进口单板分选机对单板进行分级和选择单板，并制作一系列具有不同性能的产品，可以优化木材资源。	Small logs can be made by using imported veneer sorting machines to classify and select veneers, and producing a series of products with different properties, which can optimize wood resources.
高强度 High strength	结构型 LVL 经过精心设计，比传统实木梁更坚固、更一致。这意味着它可以以最小的挠度支撑更重的负载。	Structural LVL is carefully designed to be stronger and more consistent than traditional solid wood beams. This means that it can support heavier loads with minimal deflection.
尺寸稳定性 Dimensional stability	与传统实木梁相比，结构型 LVL 不易翘曲、扭曲或弯曲，从而形成更稳定、水平的结构。	Compared with traditional solid wood beams, Structural LVL is less prone to warping, twisting, or bending, thus forming a more stable and horizontal structure.
多功能性 Multifunctionality	结构型 LVL 有多种尺寸、厚度和长度可供选择，使其适合广泛的建筑应用。	Structural LVL has a variety of sizes, thicknesses, and lengths to choose from, making it suitable for a wide range of building applications.
可持续性 Sustainability	结构型 LVL 通常由速生树木制成，制造过程中产生的废物比其他木制品更少。因此，结构型 LVL 被认为是一种环保建筑材料。	Structural LVL is usually made from fast-growing trees, and the waste generated during the manufacturing process is less than other wood products. Therefore, Structural LVL is considered an environmentally friendly building material.
易于安装 Easy to install	结构型 LVL 易于使用传统的框架方法（例如钉子和螺钉）进行切割和安装。它还与多种类型的连接器和硬件兼容，包括螺栓和吊架。	Structural LVL is easy to cut and install using traditional framing methods such as nails and screws. It is also compatible with various types of connectors and hardware, including bolts and hangers.

### 材料应用 MATERIAL APPLICATION

适用于椽子和托梁门楣、横梁和框架构件、桁架弦、门式框架、工字梁、箱形梁、脚手架板，构造型 LVL 面板被切割成具有高强度和刚度的结构构件。构造型 LVL 适合各种建筑物（包括房屋、商业、工业和乡村结构）中的梁、椽子和柱等结构应用。一些特殊的构造型 LVL 有少量单板垂直铺设（交叉带状）。在商业或工业结构中，它通常用作结构钢或钢筋混凝土的木质替代品。

Suitable for rafter and joist lintels, beams and framing members, truss chords, portal framing, I-beams, box beams, scaffold boards, and structural LVL panels are cut to provide high strength and stiffness to the structural members with high strength and stiffness. Structural LVL is suitable for beams in a wide range of buildings including housing, commercial, industrial and rural structures. structural applications such as beams, rafters, and columns in a variety of buildings, including housing, commercial, industrial, and village structures. Some specialized LVLs are available in small quantities. Some special structural LVL have a small number of veneers laid vertically (crossbanding). In commercial or industrial structures, it is often used as a structural steel or reinforced concrete substitute.

## I-JOIST

## 工字梁

产品尺寸  
PRODUCT SIZE

树种	Tree Species:	Larch/Pine
翼缘	Flange:	Material Thickness
		pine LVL 35-40mm
腹板	Web:	Material Thickness
		OSB 9-11mm
高	Depth:	200-400mm
宽	Width:	45-96mm
长	Length:	2.4-12m
胶水	Glue:	Phenol Formaldehyde
甲醛释放量	Formaldehyde Emission:	E0
证书	Certificate:	Bsi/FSC/PEFC
标准	Standard	ASTMD5055

材料优点  
MATERIAL ADVANTAGES

抗变形 Anti deformation	密度低, 且抗变形。 Low density and resistant to deformation.
稳定性 Stability	尺寸稳定, 不受气温和湿度影响。 Stable size, unaffected by temperature and humidity.
易于安装 Easy to install	可操作性强和方便快速的安装, 易于使用传统木工工具进行紧固, 如钉, 螺丝等。 Strong operability and convenient and fast installation, Easy to use traditional woodworking tools for fastening, such as nails, screws, etc.
标准化 Standardization	以标准化的产品尺寸来确保材料的效率。 Ensure material efficiency with standardized product dimensions.
环保性 Environmental friendliness	采用可持续再生的木材和 PEFC 认证。 Using sustainable recycled wood and PEFC certification.

材料应用  
MATERIAL APPLICATION

工字梁适用于作住宅、办公室、教育和轻工业建筑的地板和屋顶梁，也可以用于高温性能墙，作为螺柱和屋顶作为椽，可以做为被动式房屋建筑的绝热架构。福庆 LVL 工字梁的复合结构确保了产品的直质和轻质，优异的强度性能，使大跨度的建筑安装方便，维修方便。

I-Joist are suitable for use as floor and roof beams in residential, office, educational, and light industrial buildings. It can also be used for high-temperature performance walls, as bolts and roofs as rafters, and as insulation structures for passive housing construction. The composite structure of Fuqing LVL I-Joist ensures the straightness and lightweight of the product, with excellent strength performance, making the installation and maintenance of large-span buildings convenient.

# LVL SCAFFOLDING

# LVL脚手架

LVL脚手架是一种轻便、高强度的脚手架系统，适合需要快速搭建和拆卸的施工场景，尤其在承重和稳定性要求较高的项目中表现优异。

LVL Scaffolding is a lightweight, high-strength scaffolding system that is well-suited for construction scenarios requiring rapid assembly and disassembly. It performs exceptionally well in projects with high demands for load-bearing capacity and stability.

## 产品尺寸 PRODUCT SIZE

树种	Tree Species:	Radiata pine/Pinus massoniana
高	Depth:	35-40mm
宽	Width:	225/230mm
长	Length:	3/4/6m
含水率	Moisture Content:	5-16%
胶水	Glue:	Phenol Formaldehyde/Melamine glue
标准	Standard	OSHA

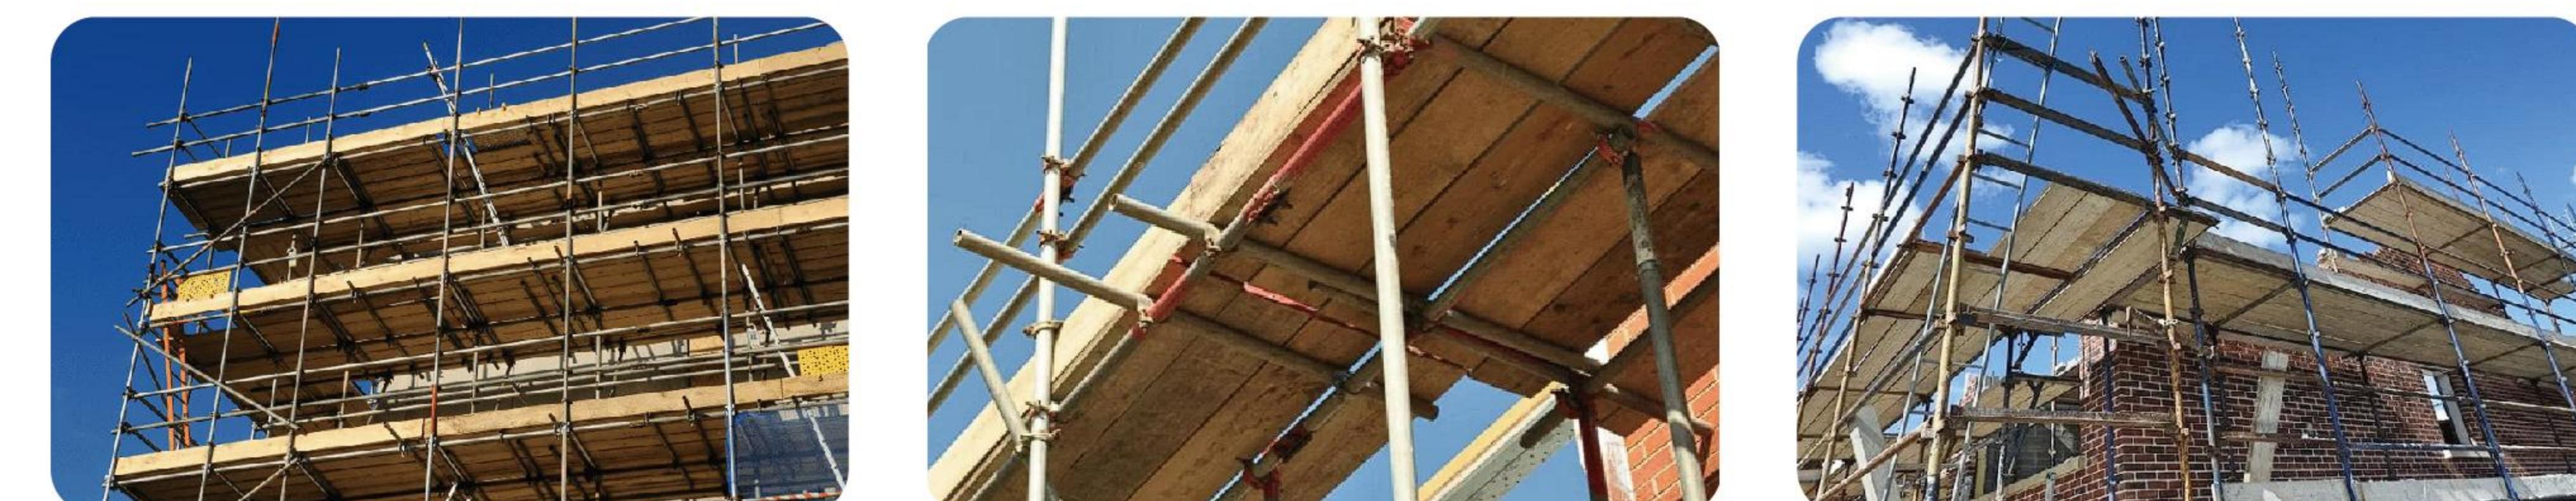

## 材料优点 MATERIAL ADVANTAGES

高强度和稳定性 High strength and stability	层压单板层压增强脚手架的强度和稳定性，使其不易变形，扭曲或弯曲。	Laminated veneer Laminating enhances the strength and stability of the scaffolding, making it less prone to deformation, twisting or bending.
强度均匀 Uniform strength	与实木不同，实木可能存在打结和裂缝等自然缺陷，LVL 脚手架的制造可以消除这些缺陷，并确保项目中使用的所有板的性能一致。	Unlike solid wood, which can have natural defects such as knots and cracks,LVL scaffolding are manufactured to eliminate these defects and ensure consistent performance across all boards used in the project.
轻 Light	LVL 脚手架虽然强度高，但重量相对较轻，简化了搬运和安装，可以提高施工现场的效率。	Despite its high strength, LVL scaffolding are relatively light in weight, which simplifies handling and installation and can improve the efficiency of construction sites.

## 材料应用 MATERIAL APPLICATION

LVL 脚手架可用于多种建筑施工活动，从桥梁建造与维修，到高层建筑的清洁和维护。除建筑施工外，LVL 脚手架也被工业领域和公用事业公司用于需要高空作业平台的任务。

LVL scaffolding are used for a variety of construction activities, from building and repairing Bridges to cleaning and maintenance of tall buildings. In addition to construction, LVL scaffolding are also used by industrial environments and utility companies for tasks requiring elevated work platforms.

# STRUCTURAL PLYWOOD

## 构造胶合板

胶合板是由木段旋切成单板或由木方刨切成薄木，再用胶粘剂纵横交错胶合而成多层的板状材料。

Plywood is made of veneers peeled from logs or small pieces cut from sawn timber in perpendicular bonded with adhesive.

### 产品尺寸 PRODUCT SIZE

MOE(Mpa)	MOE(Mpa)	F8/F11/F14/F17
树种	Tree Species	Radiata pine/Larch/Eucalyptus/Pinus massoniana
尺寸	Dimension(mm)	Thickness 7-25mm Width 910/915/1200/1220mm Length 1820/1830/1890/2400/2440/2700mm
含水率	Moisture Content	8%-12%
胶水	Glue	Phenol Formaldehyde
甲醛释放量	Formaldehyde Emission	E0/Super E0
标准	Standard	AS/NZS 2269
证书	Certificate	Bsi/CMI/JAS/FSC/PEFC

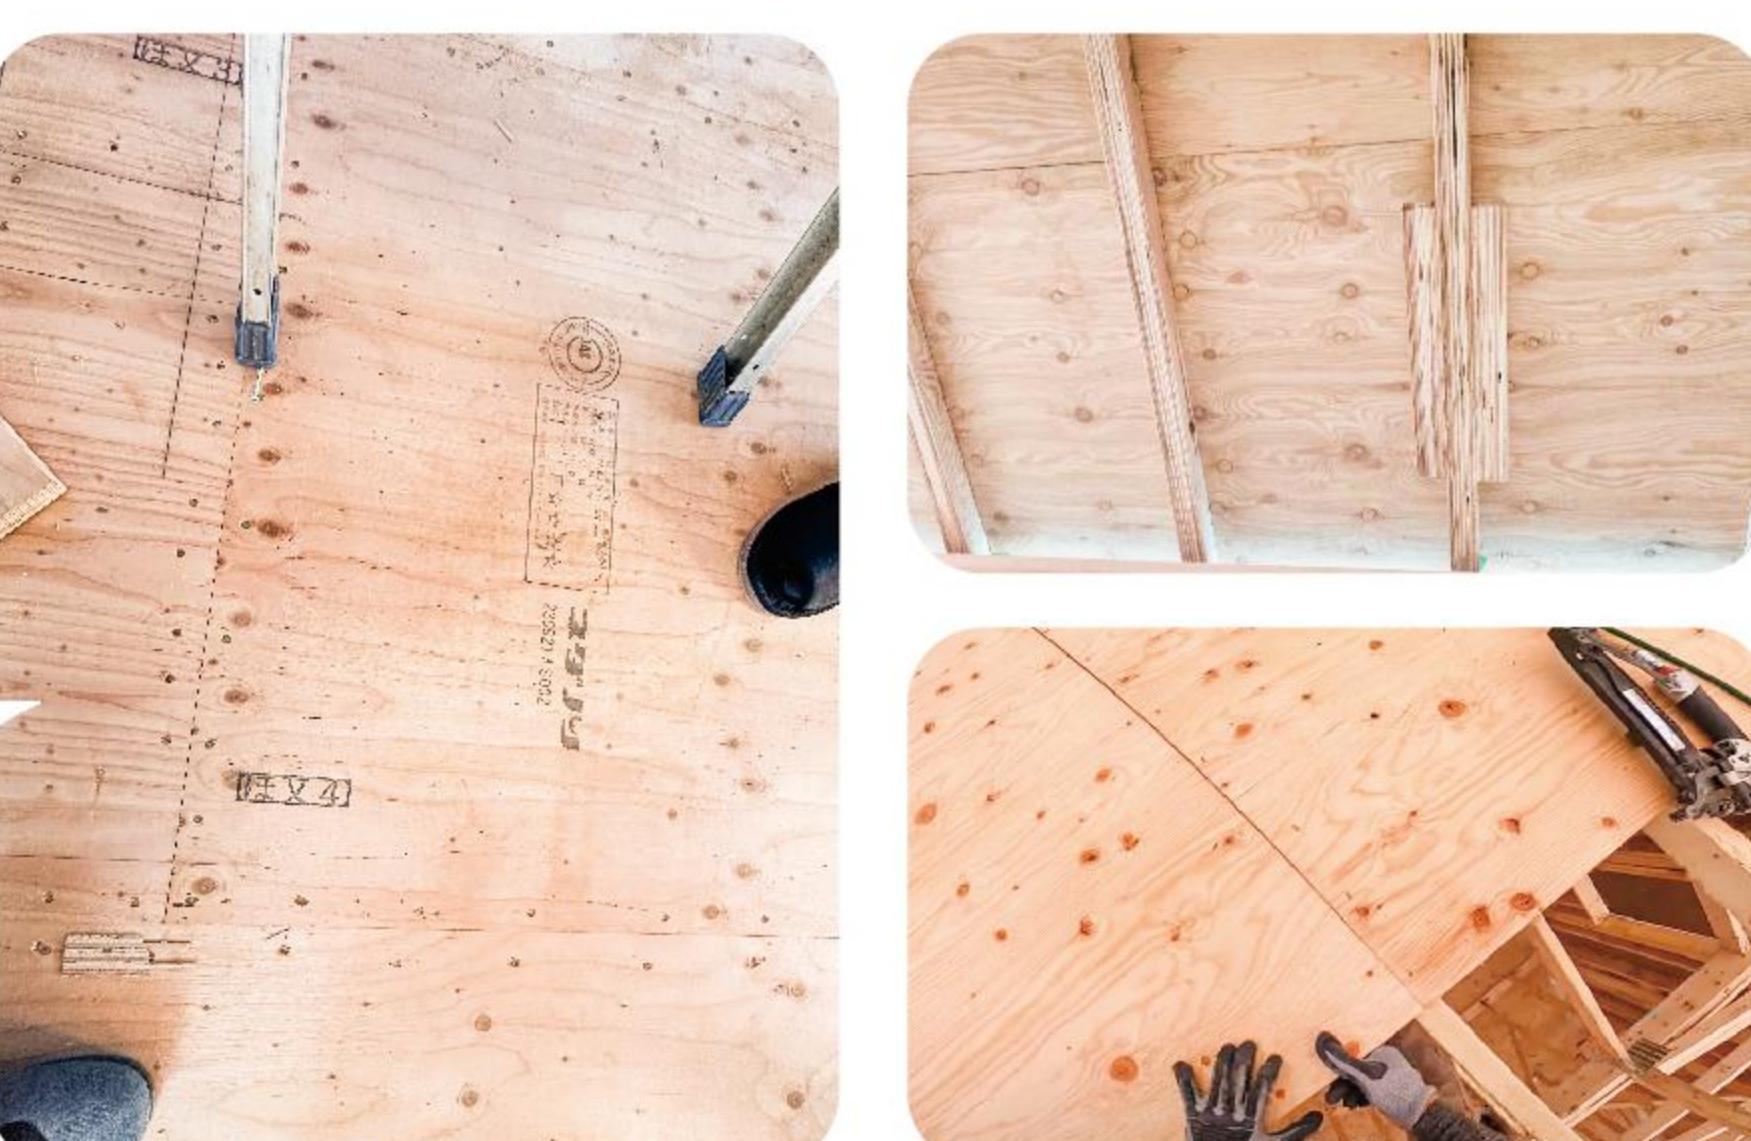

### 材料优点 MATERIAL ADVANTAGES

<b>稳定性</b> Stability	性能均匀、形状稳定，变形小、收缩率小、表面平整。	Uniform performance, stable shape, small deformation, low shrinkage rate, and smooth surface.
<b>阻燃性</b> Flame retardancy	具有较高的化学稳定性及优良的耐老化性，阻燃性能优异。	It has high chemical stability and excellent aging resistance, with excellent flame retardant performance.
<b>耐腐蚀</b> Corrosion resistance	吸水厚度膨胀率稳定，防潮性能卓越，耐腐蚀性强。	Stable water absorption thickness expansion rate, excellent moisture resistance, and strong corrosion resistance.
<b>环保性</b> Environmental friendliness	F ★★★★☆环保，燃烧剩余物无毒、无污染。	F four-star environmental protection, non-toxic and pollution-free combustion residue.

### 材料应用 MATERIAL APPLICATION

构造胶合板是家具常用材料之一，为人造板三大板之一，亦可供飞机、船舶、火车、汽车、建筑和包装箱等作用材。

Structural Plywood is one of the commonly used materials for furniture and one of the three major artificial panels. It can also be used as a material for aircraft, ships, trains, automobiles, construction and packaging boxes.

# COMPETITIVE ADVANTAGES AND CHARACTERISTICS

## 竞争优势和特色

福庆LVL坚守“高品质 高价值 高服务”的价值主张,为客户提供定制化产品。  
Fuqing LVL adheres to the value proposition of "high quality, high value, and high service" and provides customized products for customers.

### 高品质/HIGH-QUALITY

严选欧洲、北美等优质天然原材料,联合一家研究所、3所高校自主研发ENF级环保胶水。福庆LVL引进国际单板性能分选机、全自动化工字梁生产线、3条12米长生产线、高精度自动拼板机、呼吸式烘干机、电脑数控布胶机以及恒温导热油热压机等业界先进的制造设备,开创了LVL产品的智造技术先河,17年出口产品0退货。

We selects high quality natural materials from Europe and North America, and develops ENF grade glue independently in cooperation with a research institute and 3 universities. Fuqing LVL introduced international veneer grading system, automatic chemical I-Joist production line, three 12-meter long production lines, high-precision automatic splicing machine, breathing drying machine, computer numerical control glue spreading machine and constant temperature heat-conducting oil hot press and other industry-advanced manufacturing equipments, which created a pioneer of intelligent manufacturing technology for LVL products. The company has pioneered the intellectual manufacturing technology of LVL products, and exported products with zero return for 17 years.

### 高价值/HIGH VALUE

福庆拥有三个省级研发平台国家专利103项,参与起草国家标准8项,行业标准25项,为客户需求定向攻关,以科技硬实力,坚守品质原点,赋能产业升级。作为江苏省重点培育和发展的国际知名品牌,福庆LVL近年来持续开拓海外市场,在日本、澳洲、中东等国家和地区拥有较高的品牌影响力和知名度,为中国木材行业在国际市场树立了良好的品牌形象。

Fuqing has three provincial-level research and development platforms with 103 national patents, participated in the drafting of 8 national standards, and 25 industry standards for targeted research and development of customer needs. With technological hard power, we adhere to the quality starting point and empower industrial innovation and upgrading. As an internationally renowned brand that Jiangsu Province focuses on cultivating and developing, Fuqing LVL has continued to explore overseas markets in recent years and has a high brand influence and reputation in countries and regions such as Japan, Australia, and the Middle East, establishing a good brand image for the Chinese timber industry in the international market.

### 高服务/HIGH SERVICE

福庆LVL始终坚持以客户为中心的经营理念,以特色化服务为客户持续创效。福庆LVL拥有一支由具有丰富LVL生产管理经验的行业专家组成的生产研发团队,优化生产工艺,以“量身定制”的服务,进行产品“定向攻关”,为助力客户抢占市场奠定基础。福庆LVL为客户配备专业的业务顾问,随时掌握货物最新动态,17年出口产品稳定交付。

Fuqing LVL always adheres to the customer-centric business philosophy and continuously creates efficiency for customers with distinctive services. Fuqing LVL has a production and research and development team composed of industry experts with rich experience in LVL production management, optimizing production processes and providing customized services to carry out targeted product research and development, laying a foundation for helping customers seize the market. Fuqing LVL provides customers with professional business consultants to stay up-to-date with the latest developments in goods, and has been delivering stable export products for 17 years.

# TECHNICAL RESEARCH AND DEVELOPMENT

## 技术研发

多年来,福庆木业始终坚持“实实在在做人,踏踏实实做事,凭创新发展,靠创优生存”,为LVL产业健康发展做出了突出贡献。由12位行业专家学者领衔的集团研究院,深挖产业痛点,专注产品研发,推陈出新,获得多项专利,为各区域客户需求定向攻关,实现产品性能的持续升级,助力LVL产业长期可持续发展。

For many years, Fuqing Wood Industry has always adhered to the development philosophy of "being a real person, working steadfastly, developing through innovation, and surviving through excellence", making outstanding contributions to the healthy development of the LVL industry. Led by 12 industry experts and scholars, the Group Research Institute delves into the pain points of the industry, focuses on product research and development, innovates, and obtains multiple patents. It focuses on targeted research and development for regional customer needs, achieving continuous upgrading of product performance, and supporting the long-term sustainable development of the LVL industry.

## SOCIAL RESPONSIBILITY 社会责任

## 为世界制造绿色环保建材

作为中国最大LVL制造服务商，福庆LVL始终以创新、品质和可持续发展为核心价值，将“为世界制造绿色环保建材”作为企业使命。为实现这一愿景，福庆LVL大幅增加研发投入，引进先进仪器设备，集团研究院全面升级改造，并强化木业检测中心的建设。通过持续改进和严格的质量管理，福庆LVL以优质产品筑牢在市场竞争中的领先地位。

## 建设高质量团队

福庆LVL公司自成立以来，始终坚持以人为本的企业发展理念，高度重视员工队伍建设，在超过900名员工中，有300多名员工的工龄达到了10年以上。福庆LVL营造优越的工作环境与激励机制，以唤醒员工的创造潜能及创新精神。福庆成立企业大学，通过专业培训、团队协作与内部竞争，塑造一支高素质、专业化的团队，旨在为客户提供卓越的产品与服务，进而推动企业的可持续发展，共同促进行业的繁荣与进步。

## 公益慈善 感恩社会

福庆捐赠财物，持之以恒地传递着温暖与关爱。迄今为止，捐赠总额已超过1800万元，为广大贫困家庭和学子带来了实质性的帮助。这些善款惠及了1200多个贫困家庭，让千名学子受益，总计近万人得到了援助。在福庆集团的带领下，福庆基金逐渐成为福庆公益事业发展的重要载体，践行企业的社会担当。

### To manufacture green and environmentally friendly building materials for the world

As the largest LVL manufacturing service provider in China, Fuqing LVL always regards innovation, quality, and sustainable development as its core values, and regards "manufacturing green and environmentally friendly building materials for the world" as its corporate mission. To achieve this vision, Fuqing LVL has significantly increased its research and development investment, introduced advanced instruments and equipment, comprehensively upgraded and renovated the group's research institute, and strengthened the construction of the wood industry testing center. Through continuous improvement and strict quality management, Fuqing LVL has established a leading position in market competition with high-quality products.

### Building a high-quality team

Since its establishment, Fuqing LVL Company has always adhered to the people-oriented development concept and attached great importance to employee team building. Among more than 900 employees, more than 300 have worked for over 10 years. Fuqing LVL creates a superior working environment and incentive mechanism to awaken the creative potential and innovative spirit of employees. Fuqing has established a corporate university to shape a high-quality and professional team through professional training, team collaboration, and internal competition. The aim is to provide customers with excellent products and services, thereby promoting the sustainable development of the enterprise and jointly promoting the prosperity and progress of the industry.

### Public welfare, charity, gratitude to society

Fuqing donates property, persistently conveying warmth and care. So far, the total donation amount has exceeded 18 million yuan, bringing substantial assistance to impoverished families and students. These donations have benefited over 1200 impoverished families, benefiting thousands of students and providing assistance to nearly 10000 people in total. Under the leadership of Fuqing Group, Fuqing Fund has gradually become an important carrier for the development of Fuqing's public welfare undertakings, practicing the social responsibility of the enterprise.

# 合作伙伴

# PARTNER
